SAFER FLOORS. BRIGHTER TOMORROWS.

THE PROBLEM

ONE SLIP CAN CHANGE EVERYTHING.

You work hard to create an environment where people feel welcome and protected. But when hard flooring becomes wet, an ordinary walkway, bathroom, kitchen, pool deck or workspace can quickly become a potential hazard.

The consequences can extend far beyond the floor:

Injury

Lost Productivity

Liability & Litigation

Financial Loss

Damaged Trust

You shouldn't have to wait for an accident to discover a problem.

"Behind every slip-and-fall statistic is a person, a family, and livelihood worth protecting."

THE SOLUTION

MAKE YOUR FLOORS SAFER - WITHOUT REPLACING THEM.

Sure-Step non-slip is non-etching, long-lasting chemical treatment that creates an invisible, sophisticated tread design directly into hard mineral floors. It dramatically increases the Coefficient of Friction (COF) when subjected to water or liquid spills.

KEY ADVANTAGES:

Not a Film or Coating

Will not chip, peel, flake, or wear away.

Zero Down Time

Ready for immediate foot traffic after application.

Invisible Finish

Preserves the natural appearance, color and shine your floors.

Long-Lasting Protection

Minimum effective lifespan of 1+ year.

Cost-Effective Safety

A fraction of the cost of floor replacement or slip-and-fall litigation.

"Floor surfaces treated with Sure Step become safer wet than when dry."

THE RESULTS

INDEPENDENTLY TESTED & PROVEN.

Increases Dynamic Coefficient of Friction (DCOF)

Untreated wet tiles score dangerously low (0.18-0.26). Sure step elevates performance to 0.70+ DCOF.

Porcelain Tile (Wet)

Specimen	Before	After Sure Step
Sample 1	0.26 DCOF	0.73 DCOF
Sample 2	0.25 DCOF	0.71 DCOF
Sample 3	0.26 DCOF	0.73 DCOF

Ceramic Tile (Wet)

Specimen	Before	After Sure Step
Sample 1	0.18 DCOF	0.76 DCOF
Sample 2	0.19 DCOF	0.76 DCOF
Sample 3	0.18 DCOF	0.72 DCOF

Testing conducted at SSI (NY) / RSI Tribological Lab (TX) per ANSI A326.3:

"To the naked eye, the treated side could not be identified, as gloss and coloration did not appear affected." - Rimkus Lab Report

SURFACES WE TREAT:

- Porcelain Tile
- Ceramic Tile
- Quarry Tile
- Marble
- Granite
- Terrazzo
- Concrete
- Glazed Brick
- Spanish Tile
- Travertine

"No two surfaces are alike, and neither is our approach."
